Pneumococcal Vaccination in 2013: Is It 1 or 2 or 3 Vaccinations?

Are you aware that more than one-third of adults over 65 have not been vaccinated against pneumonia, and that the recommendations and guidelines have changed? This learning event sponsored by Ohio Immunization Partners for Healthy Adults (OIPHA) will help you keep abreast of the latest updates in pneumococcal vaccination.

In this brief presentation, Dr. Dale Burdett of Wright State University and Greene Memorial Hospital will review the new ACIP recommendations, share guidelines for safe and appropriate dosing, and offer strategies to improve vaccination rates in your community.
