IncyteCARES assists providers and patients in obtaining access to Jakafi through services such as prior authorization assistance and co-pay support for eligible patients. If patients are not eligible for co-pay support, IncyteCARES may refer them to alternative resources, such as independent, nonprofit co-pay assistance foundations that may be able to provide financial assistance.

State Medicaid	Any in-network* specialty pharmacy should be able to dispense Jakafi or transfer the prescription to an in-network specialty pharmacy that can dispense Jakafi.

* Some state Medicaid programs have specific laws requiring Jakafi to be dispensed by a pharmacy that is physically located in the state; thus, not all specialty pharmacies authorized to dispense Jakafi can dispense to Medicaid patients in all 50 states.
