Presented by:

Ohio Pharmacists
Foundation
and
Ohio Society of
Health-System
Pharmacists

The Ohio Pharmacists Foundation will provide one contact hour (60 minutes) of pharmacy technician education credit for each program. There is no pharmacist continuing education associated with this program.

Program Descriptions

Oral Health 101

Justin Woods, R.Ph., PharmD; Kroger Patient Care Center

Good oral health is essential to overall health because bacteria in the mouth can harm not only teeth and gums, but may be associated with serious medical conditions. Our speaker will provide an overview of OTC dental care products, prescription medicines used to treat oral conditions, as well as common medications that have side effects detrimental to oral health.

The Metabolic Syndrome: Are You at Risk?

Aimee Wallace, R.Ph., PharmD; OPA Director of Clinical Entrepreneurship Metabolic syndrome seems to be a condition that many people have, but no one knows very much about. This session will review this mysterious syndrome, including risk factors, complications and what can be done to prevent it.

Expanding the Role: A Pharmacy Technician's Role in the Pharmacy Practice Model Initiative

Erin Ortiz Blanco, Program Director, Cleveland Clinic School of Pharmacy Technology The traditional role of pharmacy technicians is changing as pharmacy services expand. Our speaker will discuss deficiencies in existing practice models, opportunities for formal training and education, certification requirements and future technician practice.

Gout Overview

Ashley Sweaney, R.Ph., PharmD; Uptown Pharmacy

This session will provide an overview of gout, including causes, symptoms, diagnosis, and treatment options. Preventing and reducing the severity of future gout attacks will also be discussed.

Pharmacy Law Update: Fall 2012

Betty Jones, R.Ph., Compliance Specialist, Ohio State Board of Pharmacy
Our speaker will provide an update on recent and proposed changes to Ohio pharmacy
law and rules. Get the latest information on prescribing by advanced practice nurses,
efforts to combat prescription drug abuse, exams to qualify technicians, and more.

Men's Health Update: Testicular and Prostate Cancers

Tracy Reeb, R.Ph., PharmD and Samuel Jacobson, R.Ph., PharmD; The James Cancer Hospital at The Ohio State University

Testicular cancer is the most common form of cancer in men age 15 to 35 years, and is highly treatable. Prostate cancer grows slowly and is the most common cause of death from cancer in men over the age of 75. Our speakers will provide an overview of these two diseases, including signs, symptoms, diagnosis, treatment options and prognosis.

Drug Shortages: Why So Many?

Brittany Schmidt, R.Ph., PharmD; OSU Internal Medicine Clinic

Drug product shortages are increasing costs, delaying patient care and preventing patients from receiving medications they need. This session will look at which drugs are the biggest problem, why they are in short supply, how the shortage is handled in practice, and federal legislative efforts to prevent and resolve prescription drug shortages.
