

| 2013 Poster Presentations

On Display at the 2013 Scientific Symposium

A Multi-Modal Approach for the Treatment of Internal Snapping Hip Syndrome: A Case Study

In-Vivo Quantification of Humeral Movement during Glenohumeral Distraction Mobilization

Force Production and EMG Activity of the Infraspinatus during Assessment of Strength: Effect of Arm Position.

Measures of Balance Performance are Affected by a Rested Versus Fatigued Testing Condition in People with Multiple Sclerosis

Understanding the Relationship of Fear with Knee Function at Medical Clearance Following ACL Reconstruction

Quantification of Forces Utilized During Glenohumeral Distraction Mobilizations

Evaluation of the ability of timed walking tests in quantifying function in sporadic inclusion body myositis

The influence of an external vs. internal focus of attention with regard to motor learning and skill acquisition for anterior cruciate ligament (ACL) injury prevention

Reliability and Validity of Two Agility Tests for Screening Non-Disabled Adults

Effects of Maturation on ACL Injury and Patellofemoral Pain Risk Factors in Female Adolescent Athletes

Mechanical Assist sit to stand training in a person with Parkinson's Disease

Vestibular Rehabilitation of a Patient with Atypical Meniere's Disease: A Case Report

Does A Common Pectoralis Minor Stretch Produce Clinically Measurable Changes in Muscle Length?

Effects of Shoulder Position on Middle Trapezius Thickness during Manual Muscle Testing of the Scapular Adductors:

Reliability and Validity of Two New Agility Tests with Younger Versus Older Workers

| 2013 Poster Presentations

On Display at the 2013 Scientific Symposium

A Pediatric Diagnosis of Dandy-Walker Variant with Encephalocele: Impact of Physical Therapy on Sensory and Motor Development

Community-Classroom Collaborations: Description of a Student Driven Screening Activity in a Geriatric Lifespan Class

Utilization of Forced Aerobic Exercise to Augment Motor Recovery Post-Stroke: A Case Study

Utilizing Latissimus Dorsi Tendon Transfer for Rotator Cuff Repair: A Retrospective Case Report

Evaluating the Efficacy of Using a Horseback Simulator to Replicate Muscle Activity Produced During Normal Ambulation

Adolescent Maturation and Postural Sway Complexity

Cardiometabolic Response from High-Intensity Interval Training in Chronic Stroke: a case study

Aerobic Exercise Prescription Methods in Chronic Stroke: a case study

Evaluation of Client Satisfaction with Pro Bono Physical Therapy Services at a Free Medical Clinic

Comparison of EMG Activity Between Two different Manual Muscle Testing Methods of the Multifidus

Types of Physical Therapy Intervention Delivered to Children with Cerebral Palsy in an Outpatient Pediatric Medical Setting

Thickness and Force Production of the Infraspinatus: The Effect of Shoulder Position.

Physical Activity, BMI and Smoking History Affect QT Interval Duration in Cardiac Patients

Feasibility and Methods of Large-Scale Baseline Testing in High School and Collegiate Athletes using the Cleveland Clinic Concussion (C3) iPad Application

Restoring Shoulder Mobility Systematically from Scaption in Four Different Shoulder Patients with Motion Restrictions and Functional Limitations
