

# Lose a child to malaria? Not in this household.

To most of us in the United States, mosquitoes are usually no more than a nuisance. But in many parts of Africa, a bite from an infected mosquito could transmit malaria and lead to death. Today we are in a special moment where we could turn this around. Working through Lutheran churches in Africa, the ELCA Malaria Campaign is uniquely positioned to help provide mosquito nets, insecticides, medication, health care, education and more to eliminate deaths from this disease—for good.
