

ReNewal[™]
Full Circle Reprocessing

Facial Protection Sterilization Program

The U.S. is currently at an all-time shortage of personal protective equipment (PPE). Medline ReNewal quickly switched our business operations to be a resource to facilities constrained by PPE availability.

Medline ReNewal is now validated to sanitize and sterilize all **tie masks, earloop masks, N-95 respirators, and face shields** that have been used by a healthcare worker. These masks, respirators, and face shields are to be collected in the containers provided and shipped in the pre-labeled shipping box to our Redmond, Oregon plant.

Items worn on a patient and grossly soiled, contaminated, wet or visibly damaged masks are strictly prohibited from our program.

Ordering Numbers:

| Item number | Description | UOM |
|-------------|---------------------------------------|------|
| REPMASKEL | Earloop mask, sanitized | EACH |
| REPMASKTIE | Tie mask, sanitized | EACH |
| REPSHIELD | Face shield, sanitized | EACH |
| REPN95I | N95 Respirator, industrial, sanitized | EACH |
| REPN95M | N95 Respirator, medical, sanitized | EACH |
