

FLUID POWER PROFESSIONALS'

DAY: JUNE 19TH

Take the time to celebrate with your friends and colleagues in the industry.

Here are some suggestions on how to celebrate the day; however, it's

“YOUR DAY TO CELEBRATE YOUR WAY!”

1. Wear emblems, pins, badges, and shirts noting your fluid power affiliation or organization.
2. Treat your staff/co-workers to a pizza π .
3. Plan a picnic or company cookout – include practical hydraulics with a squirt gun battle!
4. Take your employees to an amusement park or raffle off an admission ticket.
5. Distribute this flyer to your local customers and/or fluid power vendors. On June 19th deliver goodies to those same locals who are displaying the flyer.
6. Go see a movie with hydraulics in action or go to a 4-D motion theater with moving seats.
7. Notice how many fluid power applications you can spot on June 19th on your way to work, to the beach, or wherever you are driving, flying, or boating that day.
8. Give back to the industry! Help the next generation of fluid power professionals by making a donation to the Fluid Power Educational Foundation (www.fpef.org) to help support individual scholarships for students entering the fluid power industry and/or to the NFPA Foundation (www.nfpafoundation.org) to help build more fluid power educational resources at 2- and 4-year colleges and universities. If the fluid power industry has supported you in your career or business, please consider support of your industry by giving back and paying the generosity forward through a donation.
9. TAKE pictures of your activities and e-mail to askus@ifps.org.
