# Prevention Strategies

This exam is to be completed **ALONE** but is **OPEN BOOK**. In other words, you can use resources, but you can only consult one brain (i.e. your own). Once started, you have 180 min to complete the exam.

You will be asked for a password to access the exam - it's the correct answer to this question in **ALL CAPS**: Do you promise to complete this open book exam individually, with no help from another human? **YES or NO**

# Input on Exam Setup

## Discussion topic

For the past three years students were given the full 50 min class to write each exam, which was sufficient but not much extra time. This year there are three exams worth 26% each, I anticipate there will be 20-25 questions, 4-5 of them written answers. We have no scheduled class time so we can decide how long it should be and I think 50 min is not enough.

**What do you think? How long do you feel would be sufficient?**

# Participatory Content

## Team Discussion topic

In this lesson you learned about how much control we have over different emotional responses.

**Are there any emotions that you find easier to hide than others? Why might you be motivated to hide some emotions more than others?**

# Team Ainsworth Summary

Emotion	# mentions
Sadness	10
Irritation	5
Anger	3
Fear	3
Disgust	2
Other negative	3

	Ekman		Pavlov	
	easy	difficult	easy	difficult
26		anger/irritation	happiness	happiness
TC	excitement	anger	happiness	happiness
SD	sadness	anger	happiness	anger, sadness
HT	sadness	surprise	so	anger
CK	sadness	anger	RH	sadness
TK	happiness	love	LG	happiness
KL	happiness	anger	LW	anger
EM	happiness	difficult to hide	EC	anger/irritation
NM	happiness		FB	irritation
