

## Safety Message of the Day for IMEA Members

### **NOD (Normalization Of Deviation) Safety Message**

NOD is risk tolerance compounded over time or accepting what was once unacceptable.

The more comfortable you became on a ladder, the more you'll deviate. "Work only in front of the ladder" becomes "It saves a lot of time to reach as far to the side as possible to avoid having to reposition the ladder."

Your risk tolerance for a task increases and your perception of the hazard changes the more comfortable you get.

What doesn't change are the actual risks and hazards.

NOD will lead to tragic consequences.
