

December 2023

**Congratulations to
Lenny Larson: Retiring
from the City of
Rensselaer and
Rensselaer Electric
Utility**

Lenny Larson, Rensselaer

Lenny Larson, Manager of Operations, Rensselaer Electric Utility is retiring after 34 years. Lenny will be missed by IMEA, his team and many around the state. His time and efforts serving the association, City of Rensselaer and utilities he's assisted over the years will be appreciated for years to come.

Lenny and his team were a true powerhouse, striving to maintain personal relations with their customers. The team worked well together on and off the job, keeping the lines of communication open which is extremely important in our industry and very common within the Indiana Public Power communities.

Rensselaer Electric Utility Safety Practices

The Utility continuously strives to provide the safest workplace they can and meets regularly with outside organizations to stay abreast of best safety practices, policies and procedures. During their day-to-day operations, Lenny shared his many years of experience with his team. Rensselaer has always been a member that the IMEA Mutual Aid Network could call and rely on for assistance.

What Lenny Valued the Most!

Lenny enjoyed working with the various city staff over his long career with the City of Rensselaer and municipal utilities across the country. Lenny wore multiple hats for his community that he served and was very proud in doing so. We thank him for his tireless efforts keeping Public Power Strong. Congratulations on an outstanding career, we hope Lenny savors every minute of his retirement.

Careers in Public Power

Public power is more to communities than just an essential utility. It is a source of unique and fulfilling career opportunities in your local community. Employees make a difference by serving their own neighborhoods and families. Talented high school, college and technical college graduates and even technology, environmental and public service professionals - will find that competitive salaries aren't the only thing attractive about careers in public power.
