

Safety Message of the Day for IMEA Members

Inspection of Grounds and Jumpers is a Well Grounded Practice Safety Message

Ground Leads and Mechanical Jumpers look and feel like they're built to last forever, but looks can be deceiving. They get tossed in the truck, dropped in the mud, left hanging in the rain, and generally overlooked. With everyday use, we start to take them for granted. And slowly the wear and tear adds up, compromising their mechanical and electrical reliability.

That's why the care, maintenance, and regular testing of your grounds and jumpers are so important.

Take It Personally
