

Safety Message of the Day for IMEA Members

Don't Fall For Injuries Safety Message

With predictable regularity, falls continue to be a leading cause of accidents and deaths on the job. Falls include those on the same level (floor, ground), as well as from one level to another (stairs, ladders, roof, etcetera). They can be caused by either or both of two reasons – an unsafe action of an individual (hurrying, overreaching, improper use of equipment, etc.) or unsafe condition of the situation (poor housekeeping, unguarded opening, surface condition, etcetera).

Preventing falls is a matter of common sense. Watch where you're walking. Take careful steps when you walk and choose and use equipment properly.
