

## Safety Message of the Day for IMEA Members

### Pre-Job Planning and Hazard Assessment Safety Message

Pre-job planning is an essential step in preventing accidents and injuries. Before starting any task, linemen should conduct a thorough hazard assessment to identify potential risks and develop appropriate controls and procedures. This includes considering the nature of the work, environmental conditions, equipment requirements, and the presence of any potential hazards. By systematically evaluating the work environment, linemen can proactively address safety concerns and mitigate risks.
