

Safety Message of the Day for IMEA Members

Task Planning Safety Message

Today more than ever, demands at work are at an all-time high. Productivity is recognized and rewarded in the workplace. Working fast, however, does not always equal working productively and efficiently. When we go to do a work task it is very important to plan out the time and resources it might take beforehand.

Poor planning and inefficiency in the work process creates many problems and affects our ability to work safely and productively.
