

Join David and Jan in a discussion with Dr. Eshowsky and Lauri Mecklenburg on:

AI-ASSISTED PROVIDER DOCUMENTATION: STRATEGIC READINESS, RISK, AND REALITY

AI is changing the way clinicians document patient encounters. But adopting AI is far more complex than downloading an app or signing a vendor agreement.

This roundtable is designed for **providers and leaders** who want to understand the real-world operational, compliance, and workflow implications of implementing AI-assisted documentation.

Join us for a peer-to-peer discussion on practical readiness, including lessons learned, challenges, vendor considerations, and wins—like ending the clinic day early enough to enjoy that “**bike ride before dark.**”
