## "The conclusion of the study is that connection is the whole shooting match...

The more areas in your life you can make connection, the better. Full stop."

**George Vaillant** Director of the Harvard Grant Study (1972-2003)

"85% of your financial success is due to your personality and ability to communicate, negotiate, and lead.

Shockingly, only 15% is due to technical knowledge."

Carnegie Institute of Technology

## "There is a .71 correlation between social connection and happiness...

That's nearly twice as strong as the correlation between smoking and cancer."

**Shawn Achor** Author of The Happiness Advantage

### **Human Empathy:**

#### I HATE the term, "Work/Life Balance"

They're not two opposing forces that need to cancel each other out.

## Fulfilling work is necessary for a happy life and a full life is necessary for successful work.

We need to bring our lives - our passions, interests, and personalities — into our work if we're ever going to contribute anything meaningful.

Don't balance work/life. Instead, do your life's work.

It's not "just a paycheck," it's a third of your life.

Live it.

#### slido

If one Clydesdale can pull 2,000 lbs, then how many pounds can TWO Clydesdales pull (when properly hitched together?)

Dear Tim,

I'm the chair of the school committee and of the 37 surrounding towns and cities, 36 of them have completed major school renovations in the last few years. All except us. My town has not approved school building renovations in over 50 years. They're stubborn, set in their ways, and the kids are the ones suffering. I'm speaking at a town meeting in front of 1000 people and I need to get renovations approved and funded. That's something no school committee chair has managed to do in five decades. What do I say to these people?
