The NCPMA Premier Technician Program is designed for pest management professionals who are committed to the field and who strive to be experts in the industry.

The Premier Technician program offers a continuous series of courses that can be completed in as little as 18 months that will take your career to the next level in your understanding of pest infestations from discovery to treatment.

Each Premier Technician course is created to provide you with in-depth, hands-on training in the classroom and the field using state-of-the-art equipment. Each course is taught by top professionals and educators who will keep participants engaged and learning in unique environments.

Set yourself apart from your peers and show your dedication to your career through the NCPMA Premier Technician designation.

OUR COURSES

These courses are designed to keep you engaged from the classroom to the field as you learn how to become an “investigator” to track down, identify and treat target pests.

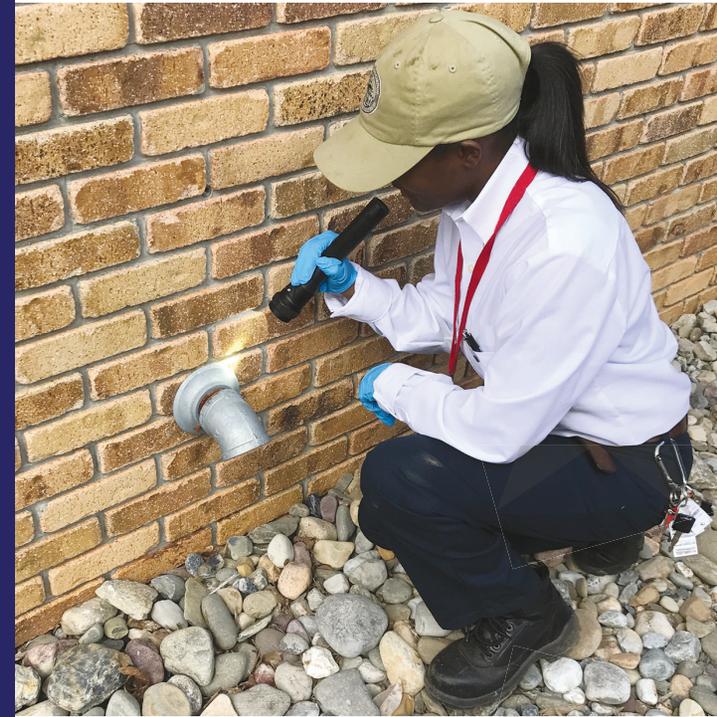

- Ants
- Bed Bugs
- Cockroaches
- Flying Insects
- Occasional Invaders/Stored Product Pests
- Rodents
- Wood Destroying Organisms
- WDIR Accreditation

COURSE COMPLETION

At the end of each 8-hour course you will receive a certificate designating that you have mastered the subject course. In order to earn the Premier Technician designation, all eight courses must be completed.

ONGOING TRAINING

To maintain your Premier Technician designation, professionals must continue to take at least one, 8-hour course every two (2) years.

STARTING TODAY IS THE KEY

Register today for the NCPMA Premier Technician Training Program by visiting the NCPMA website to see courses being offered, pricing and location.
