- We have a team of service providers we can connect our customers with including bank lenders, delivery systems, website design, insurance & security
- Graphic design of logos/branding for startup customers

Why Relocatable Units for Storage?

- Use them around edges of buildings, in parking spaces, and to fill in underutilized space. Also ideal near property lines where buildings can't be built due to zoning or easements
- Quick turnarounds. 10-12 weeks for delivery, so you can be renting out space in 3 months, without the need for city permission
- Significantly lower cost per SF than a building
- Can be customized to match existing buildings to look seamless
- Make more money than RV/boat storage
