

# COVID - 19 | Key Indicators

Last Updated: 03-22-21

Other states do not send death certificates to ODH's Bureau of Vital Statistics on a regular schedule and therefore fluctuations will be reflected in reported mortality data. Deaths are assigned to their appropriate date of death.

	Total Reported	Last 24 Hour Reported	21 Day Reported	21 Day Trend
<b>Cases</b>	<b>1,001,194</b>	<b>1,444</b>	<b>1,539</b>	
<b>Hospitalizations</b>	<b>52,207</b>	<b>78</b>	<b>87</b>	
<b>ICU Admissions</b>	<b>7,339</b>	<b>13</b>	<b>9</b>	
<b>Deaths</b>	<b>18,340</b>	<b>0</b>	<b>**</b>	

All dates are based when an indicator is reported and will not match data in other COVID-19 dashboards provided by the Ohio Department of Health. All other dashboards are based on onset date, date of hospitalization, or date of death.

Mortality data is verified by coded death certificate information received from the National Center for Health Statistics, and can take some time to receive. This information is not available daily, and is updated approximately twice per week as data is received.

\*\*Starting 03/02/2021, the COVID-19 death data will be reported from the Electronic Deaths Registration System. The "Last 24 Hour Reported Change", "21 Day Reported Average" and "21 Day Trend" metrics will initially be incomplete but will continue to be updated.

Note: Totals include Confirmed and CDC Expanded Case Definition (Probable)
