**Culture Change
Begins with
Personal Change**

Many organizations across the globe engage in a process called “culture change” in which they attempt to develop new company traits, norms, structures and behavioral patterns among employees. One approach taken by some leaders involves what they consider a top-down approach, meaning leadership creates the blueprints for culture change in the boardroom and mandates it company-wide. While this approach may work for some, lasting change may require small behavioral changes among employees working in the trenches.
