Person Centered Care Planning in Senior Care

CMS and DHHS recommend developing and implementing a baseline plan of care for each resident that includes guidelines to provide effective and person-centered care as well as meet professional standards of high-quality care. The plan should be developed within 48 hours of the resident moving into the care community.

What is included in your baseline care plan?

Psychiatric Medication Management
Mental Health Nursing
Therapeutic Behavioral Services (TBS)
Mental Health Training

SUCCESS STORY:

A ViaQuest client was admitted to a long-term care facility after nearly losing his life to sepsis and pneumonia. He recalled arriving unable to walk, feeling confused, and "never in a good mood." Adjusting from living in a big house with nice cars to one room and giving away his belongings was difficult, and he became very depressed. While working on regaining his physical strength, he still didn't feel "up to par." Once he began receiving **ViaQuest's wraparound services**, he felt more comfortable sharing things he hadn't in years. Over the past year, with ViaQuest's help and the facility staff, he no longer needs a wheelchair and walks the halls freely. Now, he's president of the resident council and a strong advocate for others. He's proud to share the article he co-wrote with staff about his and his wife's "love story." **Smiling, he told the ViaQuest team, "I can't believe I made it this far."**

**One-Stop Solution for
Mental Health Services**

The best care is integrated.™

Our strategic clinical care teams work collaboratively across the spectrum of primary care and mental health services to create integrated customized care plans for each patient. Our approach is transformative, and our industry leading outcomes prove it.

VITAS Healthcare Columbus, Ohio has
Unbelievable “Strong Corp” of Volunteers who help meet our
patient needs each and every day!

Hospice volunteers are essential to providing the level of care and support that patients and their loved ones expect from hospice care. The primary goal of a hospice volunteer is to provide empathy and companionship to both the patient and their loved ones during difficult times.

We truly believe this and that is why we have [an army of volunteers at VITAS Healthcare Columbus](#), Ohio. Having over 70 volunteers that help support our program meeting the needs of all the patients we service. Our volunteers include our Paw Pals that are support animals that go out to visit some of our patients, our Vigil Volunteers are our special volunteers who sit at bedside when a patient is passing. We also have our volunteers who sew and make busy blankets, memory items and bears out of clothing as well as VA items for our veterans and much more. We also have our volunteers who do massage therapy, aroma therapy, music, our office volunteers who also assist with office functions and just companionship with the patients on our program. We also have a strong volunteer presence with our veterans being one of two “Level V We Honor Our Veterans” hospices in the State of Ohio.

[Our volunteers listen to the patient](#) when they express themselves, offering them an outlet they might not have had before. Oftentimes their presence alone brings comfort and support, allowing patients to confide in them with their stories, secrets, fears, and hopes. Hospice volunteers also enjoy spending time with the patient, and participating in some of their favorite pastimes, like playing games, cards, or watching TV.

[Our volunteers are committed to the hospice philosophy](#) of care and service. They have a respect and reverence for life and consider it a privilege to serve the seriously and terminally ill patients and their families. Volunteers are critical to the success and caring approach of a company and their services. We feel this is one of the areas that set VITAS Columbus apart from all the others!
