

# Medication Therapy Management

“I realized that you have always been supporting me and helping me learn what I need to do to control my diabetes. Now it is time for me to take what you have taught me and put it into action. And I know that if I fall short, you will be there to catch me!” - Hannah

## Ask your pharmacist today

Medication therapy management (MTM) is more than just prescription counseling. Your pharmacist is trained to optimize the beneficial effects of your medication. Your pharmacist knows how to reduce prescription costs or find help for you in paying for your medication. Your pharmacist can help in the management of your chronic diseases. Ask your pharmacist today how to best maintain your health as well as how to best use your medications.

To read more MTM success stories and see the impact pharmacists have on their patients' lives, visit [www.ohiopharmacists.org](http://www.ohiopharmacists.org).

# MTM Success Stories

MTM services have shown positive results across many patient populations. Take a look at what patients and physicians have to say about the benefits of having a pharmacist on the health care team.

“I thought I had just done too much playing with my granddaughter! I had no idea that my new medication could be causing so much pain in my legs. I am grateful to the pharmacist for straightening this out!” - Andy

“I have so much more energy now! I can’t believe that I was using my inhaler wrong. I’m grateful that you took the time to teach me how to use it.” - Seth

“I find it helpful for a local pharmacist to closely review the medications that a patient is taking. Pharmacists frequently contact me if they see a patient isn’t filling their medications regularly. Together we can reinforce how important it is to take medications correctly and safely.” - Dr. Stotz

“I didn’t ask for diabetes, but I knew that I had to ask for help to learn how to live with it. Talking to my pharmacist during the shared diabetes appointment with Dr. George has literally been the difference between life and death for me.” - Frankie
