

Jordan Vandjelovic, Indian Health Services

Jordan Vandjelovic is the Injury Prevention Specialist at the Billings Area – Indian Health Service. He is responsible for injury prevention program operations, coordination, trainings, and other duties in collaboration with the Tribal, Federal, and Stated stakeholders in Montana and Wyoming. He is responsible for the development, management and direction of Tribal community based injury prevention programs; developing goals and objectives, planning activities, evaluation, and collection, interpretation, and dissemination of injury data for all Tribal communities.

Over the past 5 years, He has been working with these communities at the Indian Health Services, as well as the Tribal Leaders Council Tribal Epidemiology Center (RMTEC) as the Injury Prevention Epidemiologist. Here, he has worked on improving health equities relating to injuries and building Tribal capacity through epidemiological recommendations of cause and effect, also assisting with intervention and policy recommendations. In 2020, Mr. Vandjelovic graduated from the Indian Health Service – Injury Prevention Epidemiology Fellowship, researching tribal traffic laws and the associated risk for crash injury severity.
