

How to Strengthen a Community-based System of Support for Military Caregivers

REGISTER

**July 27
2:00 – 3:00PM EDT**

#AOSExploresMilitaryCaregivers

Alongside Service members who return home from war, exists a core group of individuals who help care for them. It is estimated that there are 5.5 million men and women in the U.S. who provide daily support to Service members and Veterans with disabling injury or illness. From Spouses and parents to friends and combat buddies, Military caregivers play an important role in the lives of America's wounded warriors. Beyond performing daily activities such as bathing, dressing and managing medications, often times, they must navigate a complex network of policies, systems, eligibility requirements, information, and resources to care for their loved ones. Yet, in many cases, these Military caregivers provide care at the expense of their own health and well-being.

Join this **FREE national web event** as we explore the profile of Military caregivers and examine the ways to best build caregiver support. Space is limited!

Participants will explore:

- Profile of Military caregivers
- Need for evidence-based caregiver support
- Operation Family Caregiver, a personalized program tailored specifically to the challenges faced by Military Families
- Importance of metrics
- Ways in which service providers may help
